SHUTTLE BUS SERVICE

The innovative ideas on and around CODE09, is never ending. In order to offer all professional visitors the very best service, Bella Center Exhibition Manager; Lone Ann Disch has decided to launch a shuttle bus city-activity in the period 27 - 30 August 2009. The shuttles will visit several showrooms in the City as well as a variety of tourist-attractions.

CODE Selected Shuttle is a great mix of business and pleasure.

"We want to give our visitors an all through professional and successful experience of Copenhagen. Now is the time to cooperate and present Copenhagen in the best possible way. For obvious reasons the City shuttle-service must be running during the first 4 days of the CPH design week, as the focus in this period is on the B2B market – only Sunday the public have access to experience CODE. If we wish to accomplish great things with the first international designweek, then we have to work together in order to create a new, inspirering business platform. Not all the program partners were willing to cooperate – well, CODE Selected Shuttle service is the result ... much more reasonable priced than what the companies have experienced so far"; according to a smiling Exhibition Manager.

The shuttle route will be published on <http://www.code09.dk/> late February. The route includes stops at selected showrooms and attractions in the City. More info can be obtained from Team CODE: 45 32 52 88 11.

CPH Design: WEEK 09

The first leaflet has been published by the Danish Design Center. Copenhagen will be swamped of designs in many ways. Copenhagen Design Week is the first and most unifying design platform in Denmark, and the goal is to promote Danish and international design.

The prospects are very promising, many different institutions are involved, and in very innovative ways Denmark's position as one of the world's leading design nations is promoted.

Find leaflet and other updates on www.code09.dk and while surfing: *sign up to receive our next newsletter*, which also will be innovative reading - on the website, in the sustainable way.
